Timing and shipping

When will I receive my order?

You should receive your order within 14 days from the time Catamaran Home Delivery receives your prescription. Once received, a prescription typically takes one to two days to be processed and mailed if no additional information or clarification is required. Please allow a few extra days for your first order. If you have questions or do not receive your order within 14 days, please check the website at www.myCatamaranRx.com or contact us at the toll-free number listed below.

What situations may cause a delay in prescription processing?

Situations that may create a delay include an incomplete or illegible prescription, manufacturer backorders and medications that require prior authorization. However, we will notify you if there will be a delay with your prescription shipment. To ensure timeliness in the processing of your requests, your prescriptions may be shipped in separate packages.

Note: Orders received without payment cause processing delays and extended delivery times.

Am I charged for shipping?

No, shipping is free. However, Catamaran Home Delivery also offers expedited shipping for an extra charge.

How can I check on the status of my prescription order?

Visit www.myCatamaranRx.com or call us at (800) 881-1966. Plan members who create an account on [myCatamaranRx.com](http://www.myCatamaranRx.com) will receive email notification when a prescription is shipped.

If I pay for expedited shipping, when will it arrive?

With expedited shipping, the normal transit time for postal service is reduced. However, actual prescription processing time does not change and can vary due to quality checks we perform or exceptions that may arise. Possible exceptions include needing additional information from your doctor, prior authorizations or drug interactions. These steps promote the health and safety of plan members and provide the highest level of quality when processing your prescriptions.

Why did I receive a medication supply less than a 90-day supply?

There are a variety of reasons. Typically, your doctor may have only written the prescription for 30 days or a prepackaged medication may not be packaged as a 30-, 60- or 90-day supply. Remember to ask your doctor to write a prescription for up to a 90-day supply, with up to three refills, if your doctor determines it's appropriate.

What is a "controlled" medicine versus a "non-controlled" medicine?

A controlled medicine, such as a narcotic, has stricter guidelines and may be handled differently than non-controlled medicines, such as a medication for diabetes. We adhere to federal and state laws in the dispensing of all medicines. State law may require a copy of a state-issued ID, such as a driver's license, for controlled medications to be dispensed.
